NO. 168)

Series of 2024)

SUBJECT: DPWH Performance Governance System (PGS) Yearly Targets for Measure E10 from CY 2023 to 2028

In line with the DPWH Performance Governance System (PGS) for FY 2023-2028, commitment to realize Ambisyon Natin 2040 under measure profile E10 designed to enhance the national road system by providing engineering solutions to improve road network quality and safety, this Department, through the Bureau of Quality and Safety (BQS), developed a traffic engineering and management program to address problems at critical intersections along national roads.

The Implementing Offices, have identified potentially critical intersections along national roads, which were subsequently validated by the BQS. Attached are the lists of critical intersections along N1 Corridors and the Philippine Nautical Highway and the targeted number of critical intersections with completed traffic engineering interventions per year. These traffic engineering interventions include geometric improvements, installation of traffic signals, grade separations and other features that improve intersection safety and mobility performance.

The implementing offices are directed to integrate these Annual targets in their Annual Infrastructure Program (AIP) in line with the commitment set by the Department.

This Order, which supports the Quality Management System (QMS) requirement for the identification of quality objectives and planning to achieve them, supplements Department Order No. 128, Series of 2023 and shall take effect immediately.
