

PROJECT BRIEFER

CENTRAL LUZON LINK EXPRESSWAY (CLLEX) PHASE II (CABANATUAN-SAN JOSE, NUEVA ECIJA)

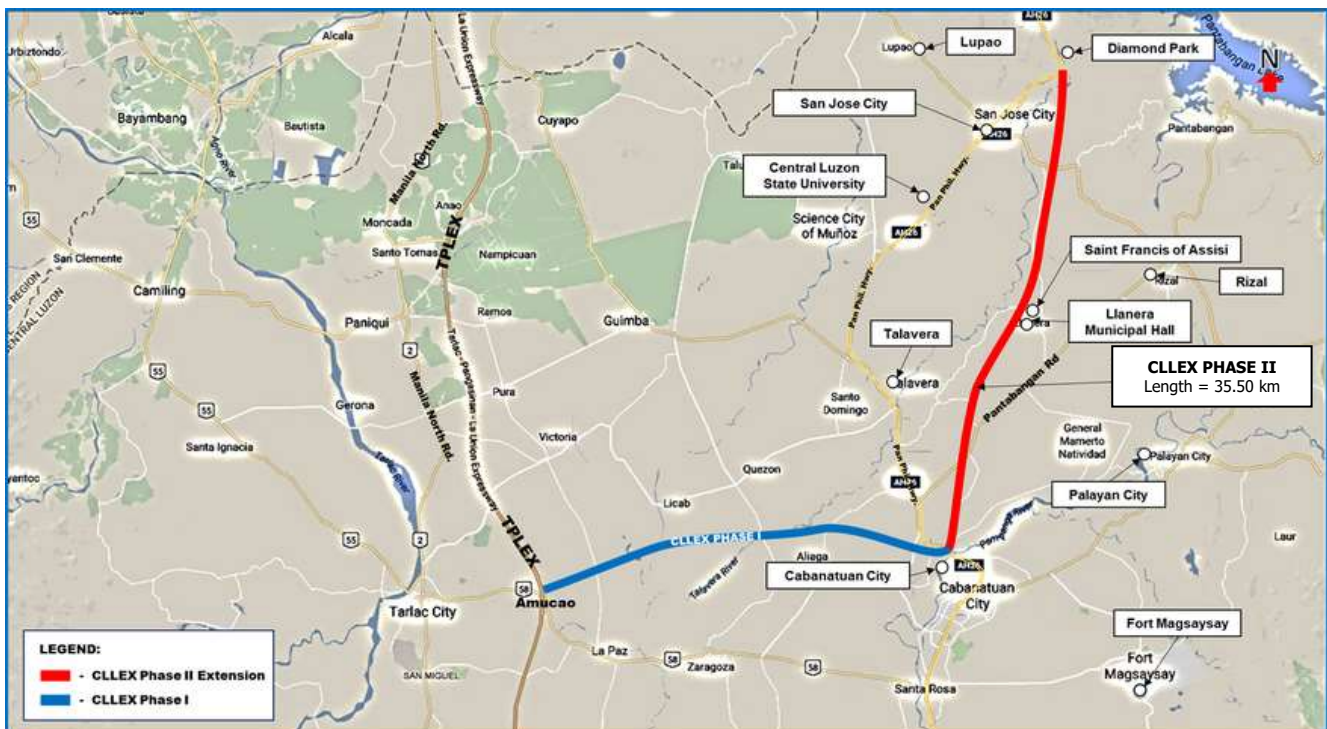

As of April 25 2025

PROJECT DESCRIPTION:

The project is an approximate 35.50 km four (4)-lane extension of Central Luzon Link Expressway (CLLEX) Phase I, Tarlac to Cabanatuan City, which will connect from Cabanatuan City to San Jose City. The project will pass through the municipalities of Talavera and Llanera in Nueva Ecija and will provide a free-flowing alternative route decongesting traffic along the Pan Philippine Highway (PPH) between said cities of Nueva Ecija and Tarlac Province. It also includes the construction of the Toll Facilities of CLLEX Phase 1.

PROJECT ALIGNMENT:

PROJECT OBJECTIVES:

- To provide a fast, safe, comfortable, and reliable means of transportation from Metro Manila to various destinations in the Central Luzon area for socio-economic development, thus, contributing to the decongestion of over-concentration of Metro Manila;
- To provide an alternative route and decongest traffic of the Pan-Philippine Highway (or Daang Maharlika);
- To form an important lateral (east-west) link of overall Expressway networks of Region III;
- Reduction of travel time between the three (3) cities; Tarlac, Cabanatuan and San Jose from 108 minutes to around 79 minutes. A travel time savings of 29 minutes.

PROJECT STATUS:

- On-going finalization of Feasibility Study.

ESTIMATED PROJECT COST:

Php 15.99 B
(As of 2024 Pricing)
