Justification:					
- Road runs on a very flat terrain of which design only requires minimal earthworks since on-grade. Hence, lower unit cost; - Project also involves earthworks such as unsuitable excavation (53.08 cu.m.), embankment from borrow (732.79 cu.m.), and subgrade preparation (1,890 sq.m.). Design of road also involves construction of drainage structure with 7 In.m. of pipe culvert (910 mm dia., Class IV); - Inclusion of miscellaneous structure such as application reflectorized thermoplastic pavement markings (white, 88 sq.m.); and - The derived unit cost is based on the approved Program of Works (POW and Detailed Unit Price Analysis (DUPA)).
