DEPARTMENT OF PUBLIC WORKS AND HIGHWAYS  
OFFICE OF THE SECRETARY  
MANILA

097.13 DPWH  
11-6-91

28 October 1991

DEPARTMENT ORDER)

No. 216  
Series of 1991

Re: Small-sized (value) projects

To provide for a more effective implementation and tracking of small-sized (value) infrastructure projects, it is hereby directed that school buildings, water supply, barangay roads, seawalls and minor flood control and drainage projects shall be under the accountability of the Assistant District Engineers and Assistant Regional Directors for Operations in addition to their regular assignments.

Henceforth, the status report on these projects shall be aggregated separately from the other project categories and will be used, aside from other factors, as a determinant in evaluating the performance of the Assistant District Engineers and the Assistant Regional Directors for Operations. For this purpose, the performance of the Assistant District Engineer shall be a function of (a) the implementation status of the above-mentioned small-sized (value) projects which shall have a weight of 60% and (b) the over-all District S-curve which shall have a weight of 40%. In evaluating the performance of the Assistant Regional Director for Operations, the implementation status of the subject projects shall have a weight of 40% while the over-all Regional S-curve shall have a weight of 60%.

This Order shall take effect immediately.

  
JOSE P. DE JESUS  
Secretary
