<b>Justification:</b> Decrease in physical target by 25.40 ln.m. from 170 ln.m. to 144.60 ln.m. due to the adoption of the drainage structure which is a double reinforced (box culvert type) drainage and at the same time serves as roadway/carriageway. This needs 180mm slab reinforced with steel grade 40 of 6,974.18 kgs.					

Based on our evaluation, the submitted request for modification of the said project is in order; hence, approval hereof is recommended.
