The physical target decreased from 2 lane kilometer to 1.41086 lane kilometer usin pavement width and 0.20m pavement thickness. The significant increase in the unit cost is due the inclusion of the necessary drainage structures, Items 404 & 405 or reinforced concrete line canal amounting to P 1,805,602.85; and Item 500 (1) b3 for the RCPC cross drains amounting to P 298,911.74. The unit cost of the item of works involved are within the range of the prevailing cost of the Department.

Based on our evaluation, the submitted request for modification of the said project is in order hence, it is respectfully recommended to the Secretary for his consideration and approval.
