<b>Total:</b>		<b>₱ 50,000,000</b>	<b>Total:</b>		<b>₱ 50,000,000</b>
<b>Justification:</b> 37% decrease in target • Decrease in physical target and increase in unit cost since the design structure for shore protection adopted the use of steel sheet piles which will stabilize the ground slopes, provide shoring walls of trenches and for coffer damming. Further, use of surplus rock to serve support of the immense siltation brought by typhoon Rolly and other annual destructive typhoons contributes to the increase in unit cost. • The derived unit cost and physical target were based on the approved plans, POW, DUPA, CMPB and Certificate of Reasonableness of Cost. 9 NO 4 attached to files					

Based on our evaluation, the submitted request for modification of the said project is in order; hence, approval hereof is recommended.
