- Revised station limits from Sta. 40+368 - Sta. 40+505 to Sta. 40+368 - Sta. 40+502.82 to maximize allocation and prioritize section that is prone to slope failure.
- The scope of works involve drilling, installation & grouting of permanent ground anchors, installation of erosion control mat, installation of active wire mesh system and application of hydroseeding for vegetation, considering that these are the major work items of the project.
- The derived unit cost is due to the design requirements as reflected in the approved design plans and relative to the attached evaluation/recommendations of Bureau of Construction (BOC).
