Total		Php 50.0M	Total:		Php 50.0M

Justification:

- This modification is requested due to the reason that the station limits reflected on the 2018 GAA has been requested to be funded as calamity project.
- Originally, the structure is a combination of reinforced concrete crib wall and stone masonry. However, double crib wall with reinforced concrete is adopted to be used because the height of the structure ranges from 9.6 meters up to 13.50 meters. The project also includes the construction of 482.60 sq.m. x 0.150 m thick PCCP shoulder.
- New limits reflected have the same scope of work. These sections were damaged/eroded by typhoons.
