| **Total** | | ₱ 2,000,000.00 | **Total** | | ₱ 2,000,000.00 |

**Justification:**

The increase in physical target from 0.400 lane km to 0.580 lane km were due to the following:

- The actual terrain of the identified road section has a minimal correction on the existing road gradient and was found flat instead of the anticipated rolling terrain for concreting;

- The road design requires minimal excavation and embankment, thus, lower unit cost per lane km.

Based on our evaluation, the submitted request for modification of the said project is in order, hence, approval hereof is recommended.
