<b>Justification:</b> <ul style="list-style-type: none"><li>The physical target decreased from 28,000 square meters to 8,059.39 square meters due to the materials used for the slope protection as reflected in the Detailed Engineering Design (DED); Approved Program of Works (POW) and DUPA.</li><li>Based on the actual field requirement, the physical target for this project is only 8,059.39 square meters, thus, the excess of ₱ 204,735.04.</li><li>The slope is stabilized using <u>High-Tensile Wire Mesh and Components</u> (Tecco High, Rope Anchor, Connection, clips and Wire rope anchor) reinforced with anchor bolts and additional layer of hydros seeding (3D Geonet/ Erosion Control Matt, Centrosema Seed and Enzyme) which constitutes 93.80% (₱ 135,757,175.94) of the total project cost.</li></ul>					

Based on our evaluation, the submitted request for modification of the said project is in order; hence, approval hereof is recommended.
