		Total: P 10,000,000			Total: P 10,000,000
Justification: <i>34 to decrease in target</i> Decrease in physical target from 500 lineal meters to 327 lineal meters due to the following: <ul style="list-style-type: none"> The project design requires twenty (20) 910 mm dia. Reinforced Concrete Pipe Culvert (RCPC) with manhole including iron ductile cover and inlets with metal steel grating cover instead of the anticipated installation of lined canal, hence, higher unit cost; Inclusion of 0.230 m Thick Portland Cement Concrete Pavement (PCCP) on 7-day curing is also considered since the drainage structure is located along the carriageway and traffic congested area; and Scope of work also includes construction of 1 meter sidewalk, curb and gutter, and removal of actual structures/obstruction (PCCP, curb, gutter and concrete). 					

Based on our evaluation, the submitted request for modification of the said project is in order; hence, approval hereof is recommended.
