Justification: <ul style="list-style-type: none">Change in type of work (should be construction of concrete road instead of construction of gravel road) to conform with the project's title which is "concreting". Also, there is an existing gravel road which needs paving/concreting to enhance accessibility and ensure safety along the road section.Road traverses a very flat terrain and design is on-grade, hence, minimal earthworks. As such, low unit cost. With this project allocation can cover the concreting of the 1.625 km road/ 3.304 lane km; andProject involves concreting of road including lined canal (230 lm) and 20 lm slope protection, installation of chevron signs and thermoplastic pavement marking.					

Based on our evaluation, the submitted request for modification of the said project is in order; hence, approval hereof is recommended.
