Justification:					
<ul style="list-style-type: none">The decrease of physical target from 1235 Lineal Meters to 573 Lineal Meters was due to the following:<ul style="list-style-type: none">To suit the actual site condition, the design of the proposed drainage structure was changed from the standard concrete lined canal to a box culvert having a height of 1.25m and width of 1.25m with a thickness of 0.18m.The inclusion paving of shoulders with a width of 1.90m at segments where these are deemed necessary also affected the decrease of the physical target.Based on PDE as per approved Program of Works and the updated Detailed Unit Price Analysis. Also, the direct and indirect effects of Oil price increase such as Equipment used in construction affected the change in physical target since their rates depends heavily on Oil products which is volatile in the recent set-up.					
Attached are the following supporting documents.					
<ul style="list-style-type: none">Certificate of Reasonableness of Cost Estimate, Certificate of Availability of Funds, Program of Works, Detailed Unit Price Analysis, Geotagged Photos and Detailed Engineering Design					

Based on our evaluation, the submitted request for modification of the said project is in order. Hence, the said request is hereby recommended for the Secretary's consideration and approval.
