<b>Justification:</b>					
<ul style="list-style-type: none"><li>Decrease in physical target/increase in the unit cost of CW1 - Construction of Road Slope Protection Structure from 2,110.25 sq.m to 1,657 sq.m due to the need to install <b>high tensile wire mesh</b> to prevent the frequent rockfall/slope collapse brought by continuous heavy rain especially during inclement weather or typhoons that will result to road closure.</li><li>The change in station limits is due to K0004+158 - K0004+207 that was moved to K0004+127 - K0004+165.50, a critical section with 39.08 meters average height and a carriageway width of 5.0m along <b>a rolling terrain</b> where there is no alternate route if closed, thus, the road section requires immediate attention to provide safety to the travelling public.</li><li>Attached are the following documents: GIS Map of the Proposed Project Work Location, Certificate of Availability of Funds, BP Form 202, Certificate of Reasonableness of Cost Estimates, Certificate of "No Overlapping" and "Not within Warranty Period", Geotagged photographs, Annexes 1-5 for Road Slip and Landslides, Approved Programs of Works (POW), and Approved Plans.</li></ul>					

Based on our evaluation, the submitted request for modification of the said project is in order; hence, approval hereof is recommended.
