CW1- Construction of Flood Mitigation Structure / 820.497 Lineal Meters	₱ 117,611.64/ Lineal Meters	₱ 96,500,000.00	CW1- Construction of Flood Mitigation Structure / 930 Lineal Meters	₱ 103,763.44/ Lineal Meters	₱ 96,500,000.00

Total:		₱ 100,000,000.00	Total:		₱ 100,000,000.00

Justification:

The project is to be modified in view of the following:

- The slight decrease in the unit cost/increase in the physical target of CW1 from 820.467 Lineal meters to 930 Lineal meters is based on the validated and Approved Program of Works (POW) with Detailed Unit Price Analysis (DUPA).
- The project is composed of a Concrete Revetment with Stone Masonry.
- The additional length was deemed necessary because the released funding for the original section is more than enough to completely address the flood control mitigation structure along the said section. Additionally, the extended section will protect the rice fields from scouring caused by the large amount of water from the river that leads to flooding.

Attached are the following supporting documents: Approved Program of Works (POW) with Detailed Unit Price Analysis (DUPA), Detailed Engineering Design (DED), Certificate of Availability of Funds (CAF), BP 202, Geotagged photos, GIS Map and Certification of No overlapping (Certified by the District Engineer, Planning & Design, Construction and Maintenance Division Chief).

Based on our evaluation, the submitted request for modification of the said project is in order; hence, approval hereof is recommended.
